

Crew and Guest Database

TICKET#	SUMMARY
106	Make it possible to print all crew and guest reports for several users. We need a filter for status and position.
893	Please correct "Martial Status" to "Marital Status".
1505	When exporting the IMO report the place of birth isn't exported.
2338	The crew id card colors cannot be changed. Please make it also possible to specify the displayed text (at the moment only "crew" is shown on the crew id card).
2339	Show crew id card expiry date on checkin/checkout form.
2469	Cannot add or rename crew and guest statuses. The add button is disabled and the name field read-only. The save button sets an empty status name which causes serious problems in the crew and guest database.

Drills

TICKET#	SUMMARY
22	Send an invitation (notification) to all onboard attendees of a drill when status has been changed to "perform".
2470	Start a drill when opening a due drill from the reminder screen and there's no postponed or started revision.

Engine Room Log

TICKET#	SUMMARY
1832	Rounds default filter "overdue" does not make any sense with projects without scheduled rounds.
2334	Search for ER Log entries opens wrong log days.

Fleetmanagement

TICKET#	SUMMARY
2709	Integrate synchronization into new IDEA.NET service.
2710	Make IDEA Online reports available in FMP.
2711	Send report data from IDEA.NET to FMP.
2712	Use same report generator engine for IDEA Online reports and forms report.

General

TICKET#	SUMMARY
31	Implementation of a license server to change license details remotely.
87	Show login timestamps of logged in users on license screen.
593	Address field within the addresses needs to accept more characters.
1545	If a client has opened different sections in several tabs it would be very handy to see the section in the title.
2416	Add page sizes 200 and 500 to grid.
2553	Resize purchase order/components/items remarks textbox.
2657	Test if cookies are supported by the browser on login.
2658	When a browser doesn't support cookies a failed login steals a user session until session timeout.
2659	Use UTC timestamps for session handling. Otherwise a session may expire too late when the time zone changes.
2660	Some static downloads may hang in Google Chrome.
2661	Set correct HTTP content-type header when downloading a static file from IDEA.NET (e.g. a document from the vessel database).

Mobile

TICKET#	SUMMARY
2157	Please add an optional system setting for defining the host shown in the QR code. If no setting is given use the hostname.

Permission Manager

TICKET#	SUMMARY
2590	Single quote in names corrupts the mouse over in the roles of the permission manager.
2632	Currently it is not possible to delete backup jobs.

Reminder

TICKET#	SUMMARY
1989	Replication reminder shows successful import date even if no data was processed.
2070	Sort reminders in alphabetical order.

Reporting

TICKET#	SUMMARY
1130	In the maintenance section any "Unplanned Tasks" checkbox does not affect the printed reports.
1762	Highlight postponed tasks on the maintenance report and display the related comment.
2123	Make it possible to add reports to the favorites list.
2494	Change title of 'Crew List (IDEA format)' if the user only selects positions (e.g. Guest + Passenger) from department/role 'Guest' to 'Passenger and Guest List'. If positions from Guest and other departments were selected the name should be 'Crew and Guest List'. Add sex (male / female) column.
2668	On the crewlist report (IMO format) the column header "11. Nature and No. of identity document (seaman's passport)" should be "11. Nature and number of identity document". The field only shows the passport number (identity number) but not that it is a passport (identity nature).

Search

TICKET#	SUMMARY
551	Make it possible to search for domains, subdomains, groups, subfolders and maintenance history.
1527	Add a due date column in maintenance search result when result is displayed as list.

Service

TICKET#	SUMMARY
2748	Add an option to delete old entries from the log table in a user-defined interval.
2749	Thumbnails look bad if an image already contains an embedded thumbnail. There's a quality loss because this picture is scaled to a larger size.
2750	Implement a graphical user interface to configure and restart the service.
2751	On some systems the IDEA.NET service may start before the Microsoft SQL server. This causes the service to stop because it depends on SQL server. Please add an option to start the service delayed.
2752	Sometimes Windows didn't recognized when the service startup failed. This means that the displayed service status was wrong.
2753	Monitor document's path changes to avoid service restarts.
2754	Write missing default configuration settings to configuration file when using the frontend.

Step-By-Step

TICKET#	SUMMARY
2641	The reports with 4+ steps per page cut the description off if it exceeds the given space.

Stock Control

TICKET#	SUMMARY
1479	Currently the sorting in "Delivered and Completed" is done by description. Please add the order # in front of the listed purchase order to get a date-sorted list.
1485	Add model and type in the shopping cart/purchase order report. Currently only the manufacturer#, supplier# and item# is displayed.
1898	Hide the "scan purchase order" menu item when the stock control module is inactive.
2377	Active inventory requires a defined "temp" path in web.config - change this!
2481	Cannot change status of purchase orders with status 05.
2520	If a purchase order is set to 'delivered and completed' but the deliverables weren't marked as received they will stay as still ordered in the system. We need to leave purchase orders with status 5 out of the order calculation.
2738	There are two minus signs in deliverables table. Please remove one of them.
2739	Add tooltips to edit, remote and jump buttons in deliverables table.

Vessel Database

TICKET#	SUMMARY
1262	When I remove a component which includes a photo the photo related to this item is still available until I do refresh the page.
2075	Deleting a storage area doesn't update the content/spares window for the next storage in line. This leads users to delete the seemingly empty storage area too with all the consequences.
2480	When a file has already been uploaded and marked deleted previously the upload fails.
2694	If you copy and paste identical PDFs between several components this generates new pdf files and references.
