

Accounting

TICKET#	SUMMARY
2898	Add a "last month" filter to the accounting screen.
2899	Don't write accounting balance to file when exporting records to XML.
2904	Refresh beneficiary list after saving an accounting record.
3104	Accounting drill down (KPIs) is empty.
3156	When clicking in the category or beneficiary box please open the suggestion list directly.

Backup

TICKET#	SUMMARY
2966	Let users specify directories for mirroring backups to.
2970	Backup fails: the process cannot access the file because it is being used by another process.
2971	Automatically refresh backup jobs and history on backup screen.
2972	Change time format on backup screen (use a 24-hour clock).
2976	Allow backups for other database names than "IDEA".

Barcode

TICKET#	SUMMARY
2677	Add a button in the item details area to print barcodes.

Crew & Guest Database

TICKET#	SUMMARY
2897	Any crew member can see all crew profiles in crew & guest database.
3045	An unnamed status causes the crew & guest database not to work. A default name can prevent this problem from happening.

Engine Room Log

TICKET#	SUMMARY
1151	Adding a confirmation to the cancel/postpone button when making rounds.
1255	We need two different permissions to lock and unlock an engine room log day.
1822	Sort rounds in round editor alphabetically.
2144	Make it possible to define hour based round intervals.
2348	User can add infinite text to round description although maximum 512 characters are allowed.
2934	Saving ER Log data within a crashed session won't show an error.
2955	Allow data type change from number to float in frontend.

Excel Import

TICKET#	SUMMARY
2888	The excel import tests if the "ItemNo" column length exceeds 100 characters but only 50 characters are valid.

Fleetmanagement

TICKET#	SUMMARY
1140	Form templates copy function.
3046	Mail address format validation is too restrictive.
3047	Receive compressed requests from IDEA.NET service.
3048	Read-only vessels (for showing reports, reminders and KPIs only).
3049	Limited vessel access for individual users.
3051	Login name once used cannot be seen afterwards within user interface.
3055	Within vessel window (left column) more information in brackets if possible.
3056	In case of missing synchronization please automatically inform our support.
3068	Tables aren't resized automatically when resizing window.
3074	Notification for forms to fill out.
3121	Code field not editable.

Forms

TICKET#	SUMMARY
3060	Within the form templates section there is a lot of blank space within the "General" tab. Please merge both tabs.
3133	When filling out a new form only assign it to the position of the logged in user.

General

TICKET#	SUMMARY
58	Add logout/session timeout notification to IDEA.NET.
88	It would be nice if you click on "Add" in the dropdown fields that a new entry with a default name like "New Entry" will be created instead of a blank entry.
1592	Please make the arrival/departure port information logged as history. This way you can have a route log of the vessel.
2660	Some static downloads may hang in Google Chrome.
2787	Date formats on "manage mobile" screen are inconsistent.
2823	Show new version information on login screen.
2824	Make it possible to download changelogs when a new version is available.
2874	If the MIME type of a file is not registered in the Windows Registry use "application/octet-stream" as fallback.
2886	Current cryptobox drivers deployed with IDEA.NET are outdated.
2896	Import new ERLog structure to demo database.
2973	Don't show sidebar by default.
3116	KPIs on homescreen don't show drill down.

Maintenance

TICKET#	SUMMARY
651	Adding actual hour counter value and due value to maintenance task.
2605	If you update an hour counter and the value is the same as last time, no timestamp is made. This is not ideal as it looks like the job has not been done.
2832	Rename "comments" to "postpone reason" on maintenance screen.
2833	When completing a postponed task add the postpone reason to the history text.
2834	Rename "Task description" to "Please enter task comments here" on the task history screen.
2835	Show last component history details on the "complete maintenance task" screen.
2839	Additional tab displaying related component details when completing a task.

Permission Manager

TICKET#	SUMMARY
1896	In the default database "Head of Department Deck" needs to be able to edit passport & visas.
2929	Allow the pursuer to edit drop down fields (general) by default.

Reminder

TICKET#	SUMMARY
2413	Please add the following reminders: Birthdays (next 30 Days) -> 90, 180, 365, COC expiry date (withing next next 30 days) -> 90, 180, 365, ENG1 (expiring within next 30 days) -> 90, 180, 365, Passports & Visas (expired or expiring within next 30 days) -> 90, 180, 365, Vaccinations (expired or expiring within. next 30 days) -> 90, 180, 365
3072	Reminder "COC expiry date" spelled wrong.
3092	With set up user defined filtering on maintenance page the reminder mess up their jump to the task. Periodic tasks and onetime tasks are confused, for example.

Reporting

TICKET#	SUMMARY
2210	Items with pictures report: out of memory exception and pictures are wrong.
2428	Wrong or missing IMO FAL form number in following reports: IMO General Declaration, Ship's Stores Declaration, Crew's Effects Declaration.
2964	Document report invisible because of temporary module assignment.

Safety Documents

TICKET#	SUMMARY
3036	Add a (sortable) column to show if a user has to acknowledge reading.

Search

TICKET#	SUMMARY
2740	Searching for documents in the vesseldatabase finds wrong documents (for example documents linked to a maintenance interval or history).
2963	Make search faster.

Service

TICKET#	SUMMARY
2825	The service redirects *all* messages to IDEA.NET.
2836	Log fleet management synchronization exceptions.
2837	Temporarily blacklist failed tasks.
2838	Make it possible to disable the startup delay.
2974	Log shutdown reason.
2983	Let service send report data to multiple FMP instances.
2986	Compress sent FMP data.
3062	Send a notification to support when FMP synchronization fails.

Stock Control

TICKET#	SUMMARY
1036	It should be possible to add foreign items with a negative amount.
1261	Add a new "Issued by" field to the print out of a purchase order below "Date" and "No" at the upper right corner of the PO print out.
1755	During the management of a form 1st) it will be possible to deactivate the function receive till status was not Purchased. 2nd) when it is on status Purchased adding the possibility to create with a click an email to the email address of the "Supply Address. Email".
1877	When you try to add items from the shopping cart list in the PO module, the opened layover window is quite small. When having a list with 6 or more items you have to scroll. Even less if there is more information to each item.
2003	When opening the details of the deliverables there will be two unit fields - the first is correct the second has the dropdown content for currencies.
2956	Inventory list report doesn't work if an item has more than one supplier.

Vessel Database

TICKET#	SUMMARY
229	Jump to the correct page in grid after adding history entry.
1757	Please leave the paste option available so an entry can be created several times in "one" step.
2077	While group and qty have too much space the name column is too small.
2840	Sometimes a document node is displayed as non-empty but it's empty.
2866	German word "Suchkategorie" is used in spares tab of job description.
